PROFILE

Passionate final-year Information Technology undergraduate at SLIIT with hands-on experience in frontend development using React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, and Bootstrap. Skilled in building responsive, user-friendly web applications and collaborating effectively within Agile development environments. Strong foundation in full-stack development through academic and personal projects. Seeking internship or associate-level opportunities in Software Engineering, Frontend Development, Full-Stack Development, or Web Application Development.

Professional Experience

Frontend Developer Intern | NextGen CodeX PVT LTD

12/2025 – 06/2026 | Sri Lanka

Developed responsive and user-friendly web applications using Next.js, React.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS and Bootstrap. Built reusable UI components, implemented responsive design, optimized frontend performance and utilized Git and GitHub for version control and team collaboration.

EDUCATION

BSc.Hons Information Technology, SLIIT (Sri Lanka Institute of Information Technology)

2023 – Present

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C, C++, R
- **Frontend Technologies:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Vue.js, Nuxt.js, Angular, Tailwind CSS, PrimeNG, Bootstrap
- **Backend Technologies:** Node.js, Express.js, NestJS, Spring Boot, FastAPI
- **Databases:** PostgreSQL, MySQL, MongoDB
- **ORMs:** Prisma ORM, SQLAlchemy, Hibernate
- **Tools:** Postman, Swagger, VS Code, IntelliJ IDEA, DBeaver, Git, GitHub
- **Concepts & Methodologies:** REST API Development, JWT Authentication, Microservices Architecture, GIS Mapping, Agile/Scrum, SDLC, OOP

CERTIFICATES

- **AI/ML Engineer - Stage 1** — Sri Lanka Institute of Information Technology (SLIIT)
- **Python For Beginners** — University of Moratuwa
- **Front-End Web Development** — University of Moratuwa
- **Web Design for Beginners** — University of Moratuwa
- **Foundations of Project Management** — University of Moratuwa
- **Project Scope and Schedule Management** — University of Moratuwa

PROJECTS EXPERIENCES

Post-Flood Rescue and Ration Distribution Management System (Ongoing 4th Year Research Project)

- Developing a full-stack disaster management platform using React.js, TypeScript, Node.js, Express.js and MongoDB.
- Building secure RESTful APIs with JWT authentication to support rescue coordination, user management and ration distribution.
- Integrating Machine Learning models using Python, Flask and Scikit-learn to predict and prioritize emergency relief requirements.
- Designing responsive dashboards and interactive Leaflet maps to monitor affected locations and support emergency-management decisions.

Customer Service Microservice | Microservices Architecture [↗](#)

- Implemented a microservices-based application using Node.js and Express.js, consisting of Product, Customer, Order, Payment and Inventory services.
- Configured an API Gateway for centralized request routing, developed RESTful APIs and integrated Swagger documentation for service testing and API management.
- Applied microservices architecture principles to improve scalability, maintainability and service independence.

Melody-Mesh [↗](#), Music Event Management Platform

- Built a full-stack music event management platform using React.js, Node.js, Express.js and MongoDB.
- Developed RESTful APIs to support event management, user interaction and collaborative features.
- Designed a modern, responsive frontend using Tailwind CSS to enhance user engagement.
- Focused on database management, input validation and clean full-stack architecture.

BookEase [↗](#), Healthcare Appointment Booking Platform

- Built a responsive full-stack healthcare appointment booking platform using Next.js, React, TypeScript, Tailwind CSS, NestJS, PostgreSQL and Prisma ORM.
- Developed secure RESTful APIs with NestJS for authentication, role-based access control, healthcare services, doctor assignment and appointment management.
- Implemented user and admin dashboards with appointment booking, status tracking, booking history, form validation and Swagger API documentation.

EduSwap [↗](#), Peer-to-Peer Skill Sharing and Learning Platform

- Built a responsive full-stack skill sharing platform using Vue.js, Nuxt.js, TypeScript, Tailwind CSS, Python, FastAPI and MySQL.
- Developed RESTful APIs with FastAPI for user authentication, profiles, skill listings, swap requests, sessions and reviews.
- Implemented user and admin dashboards with skill matching, session scheduling, review management and secure JWT-based authentication.

PinBima [↗](#), Temple Support Platform

- Developing a full-stack social-impact platform using Angular, TypeScript, PrimeNG, Tailwind CSS, Java, Spring Boot and PostgreSQL.
- Developing scalable RESTful APIs for platform services and backend operations.
- Implementing JWT-based authentication and role-based authorization for secure user access.
